R. Viskanta, *West Lafayette, Indiana*

Aim and Scope: *Numerical Heat Transfer, Part A: Applications* is an international vehicle for the publication of numerically based, results-oriented papers dealing with problems in heat transfer, mass transfer, and fluid flow. The underlying numerical solutions may be based either on available methodology or on adaptations of moderate extensions of available methods. The presentation of experimental results which support the numerical solutions is also acceptable. However, papers whose main focus is on innovative numerical methodology development should be submitted to a companion journal, *Numerical Heat Transfer, Part B: Fundamentals.*

This journal will be published in two volumes, each containing eight issues, for a total of sixteen issues for publication in 2001.

Abstracted and/or Indexed in: Applied Mechanics Review; CSA Aluminum Industry Abstracts; CSA Computer Information Systems Abstracts; CSA Engineered Materials Abstracts; CSA Environmental Sciences & Pollution Management Database; CSA Metals Abstracts/METADEX; Chemical Abstracts; CSA Corrosion Abstracts; Current Contents/Engineering, Computing, and Technology; Engineering Information Inc.; Information Service in Mechanical Engineering (ISMEC); Materials Science Citation Index™; Nova Information Services Co.; Research Alert; Science Citation Index; and SciSearch.

Production, Advertising, and Subscriptions Office: Taylor & Francis, 325 Chestnut Street, Philadelphia, PA 19106. 215-625-8900, fax 215-625-2940. **Subscriptions:** 215-269-0400. **Production Editor:** Kimberly Mestrow.

Subscription Information

Numerical Heat Transfer, Part A: Applications (ISSN 1040-7782) is published monthly (except semi-monthly in February, May, August, and November) for a total of 16 issues per year by Taylor & Francis Ltd., 11 New Fetter Lane, London EC4P 4EE, UK.

Annual Subscription, Volume 39 and 40, 2001

Print ISSN 1040-7782 Institutional: US $2340, UK £1418. Individual: US $870, UK £527.

A subscription to the print edition includes free access for any number of concurrent users across a local area network to theonline edition. Online ISSN 1521-0634 . Institutional subscribers may choose a print subscription, an online subscription, or both.

For a complete guide to Taylor & Francis Group's journal and book publishing programs, and details on advertising in our journals, visit our website: **www.taylorandfrancis.com.**

Periodicals postage paid at Jamaica NY 11431. US Postmaster: Send address changes to **Numerical Heat Transfer, Part A: Applications**, Publications Expediting, Inc. 200 Meacham Avenue, Elmont, NY 11003.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland where the sterling price applies. All subscriptions are payable in advance and all rates include postage. Subscriptions are entered on an annual basis; i.e., January to December. Payment may be made by sterling check, dollar check, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent directly to: **India:** Universal Subscription Agency Pvt. Ltd., 101–102 Community Centre, Malviya Nagar Extn, Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Company Ltd., Journal Department, P.O. Box 55, Chitose, Tokyo 156. **USA, Canada, and Mexico:** Taylor & Francis Inc., 325 Chestnut Street, Philadelphia, PA 19106. **UK and all other territories:** Taylor & Francis Ltd, Rankine Rd., Basingstoke, Hampshire RG24 8PR.

SUBJECT INDEX TO VOLUME 39

Adjoint Variable Method for the Thermal Design of Eutectic Directional Solidification Processes, in an Open-Boat Configuration, 655

Buoyancy Effects on Developing Laminar Gas Flow and Heat Transfer, in a Rectangular Fuel Cell Duct, 801
Buoyant Convection in a Cavity with a Baffle Under Time-Periodic Wall Temperature, 723

Computation of the Effective Conductivity of Unidirectional Fibrous Composites with an Interfacial Thermal Resistance, 179
Conceptual Design of Thermal Modeling for Efficiency Cooling an Array of Heated Devices Under Low Reynolds Numbers, A, 361
Coupled Heat and Mass Transfer by Natural Convection about a Truncated Cone in the Presence of Magnetic Field and Radiation Effects, 511

Effect of Inclined Vortex Generators on Heat Transfer Enhancement in a Three-Dimensional Channel, 433
Effects of Lobe Geometry on the Mixing Flow in Multilobe Mixers, 61
Electron Kinetic Theory Approach for Picosecond Laser Pulse Heating, 823
Evaluation of Two Radiation Models in CFD Fire Modeling, 711

Fast Method of Radiative Heat Transfer Analysis Between Arbitrary Three-Dimensional Bodies Composed of Specular and Diffuse Surfaces, A, 761
Finite Difference Method for Solving 3-D Heat Transport Equations in a Double-Layered Thin Film with Microscale Thickness and Nonlinear Interfacial Conditions, A, 21
Finite Element Analysis of Coupled Heat and Moisture Transfer in Concrete Subjected to Fire, 685

Genetic Algorithm for the Shape Optimization of Parts Subjected to Thermal Loading, A, 449

Heat Transfer in Confined Laminar Axisymmetric Impinging Jets at Small Nozzle-Plate Distances: the Role of Upstream Vorticity Diffusion, 777

Inverse Forced Convection Problem of Simultaneous Estimation of Two Boundary Heat Fluxes in Irregularly Shaped Channels, 737

Limiting Values for Free-Convection Induced Flow Rates in Vertical Eccentric Annuli with an Isothermal Boundary, 611

Mixed Convection in a Plane Channel with a Built-In Triangular Prism, 307
Modeling Natural Convection with Solidification in Mould Cavities, 631
Multiple Attractors of Mixed Convection, in Confined Spaces, 471
Multiple Natural Convection Solution in Porous Media Under Cross Temperature and Concentration Gradients, 553

Natural Convection and Entropy Generation from a Cylinder with High Conductivity Fins, 405
Non-Parabolic Flow Pattern at the Entrance Region in a Circular Tube with a Uniform Inlet Velocity, 857
Numerical Analysis in Interrupted Cutting Tool Temperatures, 1
Numerical Investigation of Heat Transfer from a Heated Oscillating Rectangular Cylinder in a Cross Flow, 569
Numerical Investigations of Heat Transfer over a Moving Surface due to Impinging Knife-Jets, 531
Numerical Modeling for Interaction of a Water Spray with Smoke Layer, 267
Numerical Simulation for Variations of Airflow Induced by an Object Getting In and Out of a Workbench, 593
Numerical Simulation of Condensation on a Capillary Grooved Structure, 227
Numerical Simulation of Solute Redistribution During Transient Liquid Phase Bonding Process for Al-Cu Alloy, 123

Numerical Simulation of the Gas Flow, and Mass Transfer Between Two Coaxially Rotating Disks, 285
Numerical Simulations of Particle-Laden Axisymmetric Turbulent Flows, 847
Numerical Study of g-Jitter Induced Double-Diffusive Convection, 245

Prediction of Some Compartment Fires. Part 1: Mathematical Model and Numerical Method, The, 139
Prediction of Some Compartment Fires. Part 2: Numerical Results, The, 155

Shape Design for Heat Conduction Problems Using Curvilinear Grid Generation, Conjugate Gradient, and Redistribution Methods, 487
Simulation of Turbulent Flow in Porous Media Using a Spatially Periodic Array and a Low Re Two-Equation Closure, 35
Soret Instability in a Vertical Brinkman Porous Enclosure, 339

Temperature-Dependent Reaction in Droplet-Laden Homogeneous Turbulence, 101
Three-Dimensional Inverse Problem of Estimating the Volumetric Heat Generation for a Composite Material, A, 383
Transient Conduction, and Radiation Heat Transfer with Heat Generation, in a Participating Medium Using the Collapsed Dimension Method, 79
Tube-to-Tube Heat Transfer Degradation Effect on Finned-Tube Heat Exchangers, 321
Two-Dimensional Combined Conduction, and Radiation Heat Transfer: Comparison of the Discrete Ordinates Method and the Diffusion Approximation Methods, 205
